

**LEAN SIX SIGMA BLACK BELT**

<p>Lean Six Sigma Black Belt provides a detailed information on the Lean Six Sigma fundamentals, how to drive &amp; mentor result oriented Lean Six Sigma projects, Industry specific case studies and in-depth training on Statistical software.</p>	
<b>Duration</b>	54 Value Added Hours
<b>Objective</b>	To enable students with necessary knowledge, methodologies & skills required to drive & mentor DMAIC Lean Six Sigma Black Belt Projects in their respective industry.
<b>Who Should Attend?</b>	<ul style="list-style-type: none"> <li>• Professionals with 4+ years of experience</li> <li>• Any Professionals serious to accelerate their corporate career</li> <li>• Anyone who wants to consider Lean Six Sigma their career</li> <li>• Certified Green Belts looking to equip them to be able to drive projects</li> </ul>
<b>Project Assistance</b>	Free Assistance from an expert from your respective discipline
<b>Essentials</b>	Certified Green Belts with minimum of 1 year as Green Belts or Professionals with 4+ years of Industry experience
<b>Course Program</b>	<p><b>LEAN:</b></p> <ul style="list-style-type: none"> <li>• Introduction to Lean</li> <li>• What is Lean &amp; Its Applications ?</li> <li>• Types of Waste</li> <li>• <b>Value Stream Mapping (Simulation to understand)</b></li> <li>• Value Added &amp; Non- Value added</li> <li>• Takt Time &amp; Process Efficiency</li> <li>• How to identify Distinct Types of Waste</li> <li>• <b>Identify waste (Simulation to understand)</b></li> <li>• Introduction to Kaizen</li> <li>• <b>Value Stream Design(Simulation to understand)</b></li> <li>• Value Stream Planning</li> <li>• Lean Tools / Methodologies</li> <li>• How to implement Lean Tools / Methodologies (Industry specific case studies)?</li> </ul> <p><b>DEFINE:</b></p> <ul style="list-style-type: none"> <li>• What is Six Sigma?</li> <li>• History &amp; future/potential of LSS</li> <li>• Why LSS &amp; Application of LSS?</li> <li>• How LSS is different?</li> <li>• <b>Change Management(Simulation)</b></li> <li>• Dealing with Change management</li> <li>• Facilitator &amp; Role of a Facilitator</li> <li>• Leadership</li> <li>• DMAIC / DFSS</li> <li>• <b>Balanced scorecard</b></li> </ul>

- Voice of Customer & Business
- Develop CTQ's, CTB's, CTQ tree
- **Quality Functional Deployment**
- **Kano Analysis**
- Identify Business Problem
- Identify Problem & project charter
- Team identification, roles & timelines
- **Goal statement & elevator speech**
- SIPOC, project boundaries
- Map Business Process
- Process Mapping & Value Stream Mapping (Recap)
- Define Phase sign off & toll gate

**MEASURE:**

- Define Process and Output Metrics
- Develop Operational Definitions
- Data Collection Plan
- **Sampling & different types of Samples (Simulation)**
- Regional sub grouping
- Variation & source of variation
- Measurement System Analysis
- Accuracy & Precision
- Repeatability & Reproducibility
- Special Vs common cause
- Basic statistics & probability
- **Variance (Simulation)**
- Introduction to Minitab
- Validate Measurement System
- Different data types Performance/Capability
- Sigma level for overall & sub grouped data
- Baselineing & goal validation
- Measure Phase sign off & toll gate
- Graphical plots like Histogram/ Dot plot, Pareto Chart, Individual value plot, Scatter diagram

**ANALYZE:**

- Identify potential causes (X's)
- Brainstorming
- Cause & effect
- **FMEA (Simulation)**
- Value stream mapping (Recap)
- Different types of wastes
- Prioritize Critical X's
- Concept of P value
- Conduct Root Cause analysis
- Normal & Non Normal data
- Hypothesis testing for normal, non normal & discrete data
- Data Analysis Based on Data Type
- Correlation & Regression
- 1 Sample T, 2 Sample T, Anova

- Moods Median
- Logistic Regression Analysis
- 1- Proportion, 2- Proportion &
- Chi Square Test
- Identify Critical X's
- Validate Critical X's
- Arrive  $Y=f(x)$
- Quantify the Opportunity
- Prioritize Root Causes
- **Design of Experiments with simulation example**
- Analyze Phase sign off & toll gate

### IMPROVE:

- Develop Potential Solutions
- **Brainstorming**
- **SCAMPER**
- **doHow Gamification**
- **Six Thinking Hats**
- Response Optimizer
- Solution prioritization matrix
- Mistake Proofing & Different types of mistake proofing
- Solution risk analysis
- Optimize Solution
- Value stream Design
- Implementation Plan
- Process Design
- Stakeholder and impact analysis
- Develop Pilot Plan & execute
- Implement solutions
- Design of Experiments full factorial & fractional factorial experiments
- Improve Phase Sign off
- Lean solutions like SMED, JIT, Kanban, Total Productive Maintenance, single piece flow, Hijunka, Lean line designs, Line balancing ((Recap)

### CONTROL:

- Introduction to Control Phase
- Process Risk Analysis
- Different types of control
- What is SPC
- Control charts & types
- Develop SOP, control charts
- Process Control System
- Monitor & Standardize Process
- Identify opportunities to horizontally replicate
- Calculate Financial Benefits
- Audits & Frequencies
- Project sign off
- Control Phase Sign off

## Brochure

	<ul style="list-style-type: none"> <li>• <b>Case Study 1</b></li> <li>• <b>Case Study 2 with Minitab Practice</b></li> </ul>
<b>Trainers Profile</b>	An expert with a minimum of 10 years of experience in Lean Six Sigma & led minimum 50 Lean Six Sigma Projects
<b>Course Fee Includes</b>	<ul style="list-style-type: none"> <li>• Six Days of Simulation Enabled coaching</li> <li>• One Hard copy of Course Material with 5 case studies</li> <li>• doHow Gamification</li> <li>• Five Sample Question papers with solutions</li> <li>• Examination &amp; Certification Cost</li> <li>• Support in Executing Project for a period of 24 Months</li> <li>• Project evaluation by experts from your respective domain</li> <li>• Special Invite to attend Xergy's students'GB &amp; BB project presentations</li> <li>• Refresher trainings at minimal charges</li> <li>• Mentorship &amp; Assistance to accelerate your corporate career</li> <li>• 100% Placement Assistance</li> <li>• Refreshment at the training venue</li> </ul>
<b>Certification Procedure</b>	<ul style="list-style-type: none"> <li>• Attend 6 days training</li> <li>• Successful completion of Black Belt Certification Exam conducted by TUV with 60% marks (at the end of 6th day)</li> <li>• Submission of project (within 8 months from the date of completion of the Course)</li> </ul>
